On 24th Dec 2013, the Eve of Christmas, our company spent her 10th birthday. All of our staffs joined the celebration party. In the party, our CEO, Mr. Lin reviewed the company history from 2003-2013. We have growed from a small workshop to a middle scale dies & mould manufacturer. During these 10 years, we meeted many difficulties and development problems, such as the global economic crisis in 2008. Luckily, we got over it and made a explosive development.

As the CEO Mr. Lin said, the most important reason for our continuous growth, is that we always insist on the product quality to be our group life. We adjust the strategy along with the updated situation.

In the future, we will make the most efforts to offer high quality die mould and become the first grade die mould supplier all over the world.
